

Lion Power EP-450P5-L1

TOP-450NF, a better than fan less power supply, is designed for users who cares about both noise and powerful output. A stand-by fan installed inside the Lion power supply which will working only when executing a loading over 250W (like playing 3D games, graphic capture and heaving graphic drawing).

The PSU remained completely quiet for light load operation like word processing or Internet browsing. Exclusive silent operation will definitely meet user requirement.

Fan on switch and indicator

Stand-by fan turn on when load is high

A/C Input 100-120Vac/200-240Vac 10/6A 60/50Hz

DC Output	Max Current
+3.3V	28A
+5V	42A
+12V	22A
-12V	1.0A
-5V	0.8A
+5VSB	2.5A

Peak Watts
520W

Specification:

- ◆ Compliant with ATX12V 1.3 version standard.
- ◆ All output rails with OVP/SCP/OCP protection.
- ◆ Line input fuse protection.
- ◆ Titanium Coating add EMI shielding.
- ◆ Temperature sensor.
- ◆ Case Fan Speed Control.
- ◆ Stand-by Fan: turns automatically or by switch.
- ◆ Blue LED light when stand-by fan turns.
- ◆ Serial ATA power lead.
- ◆ Dedicated VGA power lead with EMI filter.
